

## JONATHAN FAN

17 Shagbark Ct, Iowa City, IA 52246 • jonathanfan1256@gmail.com  
• (540) 818-7855 • <https://www.linkedin.com/in/jonathanfaniowa/> • <https://www.jonathanfan.site/>

EDUCATION	<b>YALE UNIVERSITY</b> <b>Department of Mathematics</b> Bachelor of Science, May 2027 <ul style="list-style-type: none"><li>• Emphasis in Economics, Mathematics, Statistics, and Data Science</li><li>• Coursework: Linear Algebra, Probability Theory</li><li>• Clubs: Yale Alternative Investments, Yale Student Quantitative Research Group, Yale Christian Union</li><li>• GPA: N/A</li></ul>	<b>New Haven, CT</b>
	<b>UNIVERSITY OF IOWA</b> <b>College of Liberal Arts and Sciences</b> Non-degree High School Student, May 2023 <ul style="list-style-type: none"><li>• Coursework: Calculus III, Discrete Structures, Introduction to Linear Algebra, Introduction to Numerical Methods: Analysis and Computation</li><li>• GPA: 4.00/4.00</li></ul>	<b>Iowa City, IA</b>
<b>PROJECT</b> <b>2023-Present</b>	<b>AlgoFacto Hedge Fund</b> <b>Project Creator</b> <ul style="list-style-type: none"><li>• Created a python package that allows users to efficiently craft alpha factor gradient-boosted ML models, whether that means designing factors, predicting future returns, tuning hyperparameters, or optimizing portfolio weights</li><li>• Designed and Replicated 500+ factors (i.e., macro, value, momentum, etc.) via multi-factor dynamic regression models, PCA eigen-loadings, Cross-sectional K-means clustering, etc.</li><li>• Devised 6 profitable trading strategies (robust out-of-sample testing and stress tests), with a focus in ML-Based, Factor-Based, Smart-Beta, Statistical Arbitrage, and Trend-Following Strategies</li><li>• Coded fully-automated live-trading executional system using IBKR API and striving to run a strategic asset allocation portfolio of 10-15 profitable strategies live in the upcoming 6 months (\$10K Capital)</li></ul>	<b>New Haven, CT</b>
<b>EXPERIENCE</b> <b>2023-Present</b>	<b>YALE SCHOOL OF MANAGEMENT</b> <b>Research Assistant</b> <ul style="list-style-type: none"><li>• Programming LLMs and RAG to process thousands of self-trained word embeddings (i.e., NYT, WSJ, etc.) to generate novel Uncertainty Indices correlated with current Uncertainty Measures (i.e., EPU). Researching under Professor Yinan Su's and Professor Leland Bybee's guidance.</li><li>• Published a paper with Professor Leland Bybee as a contributor. Created a repo to replicate Bubbles for Fama's Factor Characteristics and industry portfolios from Kenneth French's Data Library.</li></ul>	<b>New Haven, CT</b>
<b>2020-2022</b>	<b>UNIVERSITY OF IOWA COLLEGE OF NURSING</b> <b>Lead Algorithm Researcher</b> <ul style="list-style-type: none"><li>• Published paper on using deep learning to effectively identify and extract symptom information from electronic health records (EHR) to allow physicians to automatically analyze any given EHR</li><li>• Led a team of 5 with Dr. Gilbertson-White to develop a system and run computer simulations using PyTorch, Tensorflow, Keras, and Python</li></ul>	<b>Iowa City, IA</b>
<b>2022-2022</b>	<b>YALE UNIVERSITY</b> <b>Research Assistant</b> <ul style="list-style-type: none"><li>• Published paper under Professor Dragomir Radev's mentorship and his LILY Lab team to create FOLIO (First Order Logic) Dataset</li><li>• Assisted in data creation process by writing 20 First-Order-Logic &amp; English stories for dataset, analyzed 180 natural language data structures, and devised conclusions from 75 premises in human performance task</li></ul>	<b>New Haven, CT</b>
<b>2021-2022</b>	<b>UNIVERSITY OF IOWA COLLEGE OF ENGINEERING</b> <b>Secondary Student Training Program</b> <ul style="list-style-type: none"><li>• Crawled twitter data relating to recent tweets regarding the Supreme Court's Decision on overturning Roe vs. Wade using a Search API to analyze human reaction to the decision</li><li>• Developed a deep learning model to predict geo locations of where certain tweets came from and ran a sentiment analysis on the texts using the RoBERTa-model</li></ul>	<b>Iowa City, IA</b>
<b>2020-2020</b>	<b>NATIONAL ADVANCED DRIVING SIMULATION</b> <b>Data Analyst Intern</b> <ul style="list-style-type: none"><li>• Coded a Batch-Processing method using Python to preprocess and clean unstructured eye-tracking pixel data to determine areas drivers frequently viewed (e.g., phone, road, surrounding areas, etc.)</li><li>• Visualized data through graphs that contained quadrants to separate x-y pixel points and processed survey data and used SmartReader (AI Survey Machine) to analyze responses</li></ul>	<b>Iowa City, IA</b>
<b>SKILLS</b>	<ul style="list-style-type: none"><li>• Fluent in Python, Ray, Pandas, Numpy, Tensorflow, Keras, PyTorch, Optuna, Scikit-Learn, HTML, CSS, LightGBM, XGBoost, CatBoost, SQL, Asyncio</li><li>• Adequate knowledge in machine learning, data visualization, and statistical analysis</li></ul>
